

HYPNOGRAM

Welcome to the world of dreams.

The drink list is inspired by Hypnogram, the graph showing brain activity during sleep.

REM drink list is made to let you experience the stages of sleep but in wakefulness.

Depending on your arrival time, you'll be offered a specific drink list that will stimulate and activate the same sensations your brain perceives at night when you are asleep.

If you are reading these words you are in the **REM** state.

Brain activity is at its highest peak at this stage.

Dreams are more vivid and deep-dive into the unconscious. All the drinks stimulate the brain in the same way deeply.

Check the lightbox in the room to see when the next sleep stage is on.

Let your dream begin!

STAY AWAKE

REM
